Note: Above Screen shows about Design of screen and colour.

Registration -

POST Call -

API Details -

http://199.192.26.248:8000/sap/opu/odata/sap/ZCDS_C_TEST_REGISTER_NEW_CDS/ZCDS_C_TEST_REGISTER_NEW

IN PAYLOAD DATA,

Please USE YOUR NAME,EMAIL ADDRESS and other details instead of just taking values from Screen shots. Screen shots are just for REFERENCE only. Don't COPY SAME DATA.

```
{
  "Name" : "Mahesh",
  "NameUpper" : "MAHESH",
  "PhoneNo" : "7828827654",
  "WhatsappNo" : "7828827654",
  "CountryCode" : "IN",
  "Email" : "mahesh@gmail.com",
  "Gender" : "M",
  "Age" : "21",
  "AgeUnit" : "Y"
}
```

The screenshot shows the Postman application interface. At the top, it displays a POST request to the URL `http://199.192.26.248:8000/sap/opu/odata/sap/ZCDS_C_TEST_REGISTER_NEW_CDS/ZCDS_C_TEST_F...`. Below the URL, there are tabs for Params, Authorization, Headers (12), Body (selected), Scripts, Tests, and Settings. Under the Body tab, the content type is set to raw JSON. The JSON payload is identical to the one shown in the code block above. There are also tabs for Cookies and Beautify.

```

1 {
2   "Name" : "Mahesh",
3   "NameUpper" : "MAHESH",
4   "PhoneNo" : "7828827654",
5   "WhatsappNo" : "7828827654",
6   "CountryCode" : "IN",
7   "Email" : "mahesh@gmail.com",
8   "Gender" : "M",
9   "Age" : "21",
10  "AgeUnit" : "Y"
11 }
12

```

Please make sure that there would be **NO Authorization selected in the Authorization tab.**

This screenshot shows the same Postman interface as the previous one, but with a different configuration. The Authorization tab is now selected, and the dropdown menu under the Type field shows "No Auth". The other tabs (Patient, Patient La, Get, POS, http, https://api, http, https://gra, http) are still present but not selected. The URL and method remain the same as in the first screenshot.

Headers Parameters are as per below screen shots -

The screen below should look the same in Postman. **This settings are very important in the header section.**
